SUMMARY

A Full-Stack Software Engineer with a background data monitoring in a financial institution using Oracle Database, currently working in Biomedical and Pathology Lab. Pursuing a master's in computer science, I was very fascinated and passionate in coding after my first Java Programming course.

SKILLS

JavaScript, Java, HTML 5, CSS, Ruby on Rails, React, Express, jQuery, Handlebars, Bootstrap, Node.js, AWS S3, MongoDB/Mongoose, Heroku, Git/GitHub, Oracle SQL/MySQL, fluent in English and French.

RELEVANT EXPERIENCE & PROJECTS

Software Engineer Fellow at General Assembly, Boston, MA

June-August 2019

-Completed 12-weeks immersive course on full stack software engineering using a variety of modern programming languages and technologies.

Projects:

-Lab PathLab: A Single Page Application. Implemented API which allows authenticated users to create, view, update, and store patient's information. Technologies used: Express.js, MongoDB, React.js, JavaScript, HTML5, CSS3, Axios, Materials UI.

-Chat Box: Team Full-Stack Project. A Single Page Application for real-time, bidirectional online messaging using Socket.io.

Authenticated users can chat with other users and could only update or delete owned messages. Technologies used: Express.js, MongoDB, AWS, JavaScript, jQuery/AJAX, HTML5, CSS3/SASS, Handlebars, Bootstrap.

-MyPlan: Full-Stack project. Single Page Application that allows authenticated users to create a planning, view, delete and update own entries. Technologies used: Ruby on Rails, PostgreSQL, JavaScript, jQuery/AJAX, HTML5, CSS3/SASS, Handlebars, Bootstrap

-Tic-Tac-Toe Game: This is a Game project, a single-page application, Authenticated user is able to have access to a game aboard and play (switch turns between X and O. Player is able to view when there is winning or ties and display game statistic). Technologies used: JavaScript, jQuery/AJAX, HTML5, CSS3/SASS, Bootstrap.

Service Desk Analyst at Ecobank, – Kara, Togo

05/2006 – 08/2008

Responsible for monitoring (alert log, memory, disk I/O, CPU, database network connectivity)

Created different table spaces, tables, Schema, constraints to enforce business rules, managed users accounts. Experience in working with Database Management System (DBMS) automation scripts

OTHER EXPERIENCES

Cytology Technician at Boston Medical Center – Boston, MA

06/2015 - Present

Peri-operative Technician at Boston Medical Center – Boston, MA

08/2013 - 06/2015

Public Space Attendant/ Busser Boy at Revere Hotel –Boston, MA

09/2008 – 08/2013

EDUCATION

Boston University: Boston, MA: **MS** in Computer Science:

01/2019- present

General Assembly: Boston, MA: **Certified** Full Stack Engineer Immersive

Jun-Aug 2019

Boston University: Boston, MA: **BS** in Biomedical Lab/Clinical Science

2016 - 2018

DBA Online Study Oracle Database 11g Administrator **Certified** Associate

2013 - 2015

Bunker Hill CC Boston, MA: **Associate** Degree in Arts & Science

2009 - 2013

University of Kara, TOGO: **BS** in Finance Accounting

2004 - 2008
